The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem. Once the problem is identified, the next step is to define the objectives of the project. These objectives should be clear, measurable, and achievable. The third step is to develop a plan of action, which includes identifying the resources needed, setting a timeline, and determining the roles and responsibilities of the team members. The fourth step is to implement the plan, which involves executing the tasks and monitoring progress. The final step is to evaluate the results and make adjustments as needed.

The second step is to define the objectives of the project. These objectives should be clear, measurable, and achievable.

The third step is to develop a plan of action, which includes identifying the resources needed, setting a timeline, and determining the roles and responsibilities of the team members.

The fourth step is to implement the plan, which involves executing the tasks and monitoring progress. 12
 The fifth step is to evaluate the results and make adjustments as needed.

The final step is to evaluate the results and make adjustments as needed.
