Figure 1. Schematic diagram of the experimental setup. The subject is seated in a chair, and the head is fixed to a headrest. The headrest is connected to a computer system via a cable. The computer system is connected to a data acquisition system (DAQ) via a cable. The DAQ is connected to a signal conditioner (SC) via a cable. The SC is connected to a power supply (PS) via a cable. The PS is connected to a motor (M) via a cable. The motor is connected to a turntable (T) via a cable. The turntable is connected to a subject (S) via a cable. The subject is seated in a chair, and the head is fixed to a headrest. The headrest is connected to a computer system via a cable. The computer system is connected to a data acquisition system (DAQ) via a cable. The DAQ is connected to a signal conditioner (SC) via a cable. The SC is connected to a power supply (PS) via a cable. The PS is connected to a motor (M) via a cable. The motor is connected to a turntable (T) via a cable. The turntable is connected to a subject (S) via a cable.

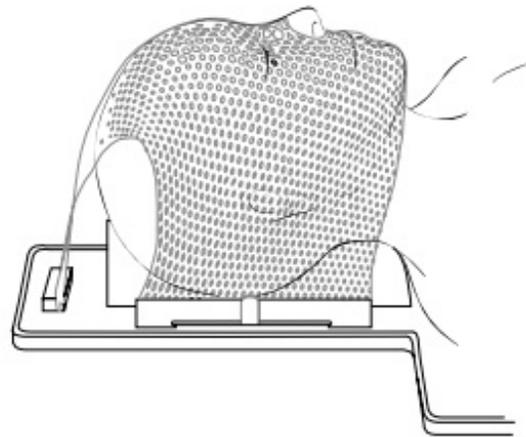

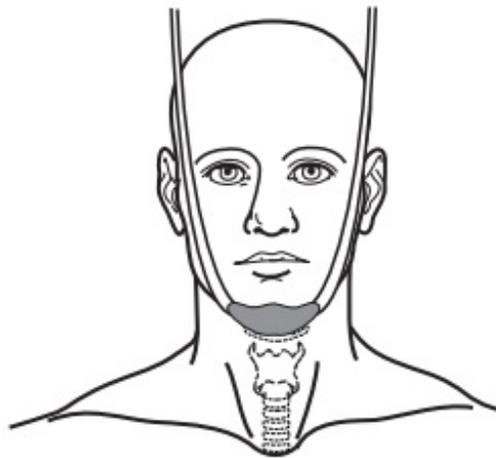

Figure 1. Schematic diagram of the experimental setup.

The subject is seated in a chair, and the head is fixed to a headrest. The headrest is connected to a computer system via a cable. The computer system is connected to a data acquisition system (DAQ) via a cable. The DAQ is connected to a signal conditioner (SC) via a cable. The SC is connected to a power supply (PS) via a cable. The PS is connected to a motor (M) via a cable. The motor is connected to a turntable (T) via a cable. The turntable is connected to a subject (S) via a cable.
