How To Use Your iHealth® Pulse Oximeter

This information explains your iHealth pulse oximeter and how to use it.

Please visit www.mskcc.org/pe/use_ihealth_pulse_oximeter_video to watch this video.

A pulse oximeter is a device you place on your finger. It measures your blood oxygen level (how much oxygen is in your blood) and pulse rate (how fast your heart is beating). These measurements show how well oxygen is getting to different areas of your body.

Your iHealth pulse oximeter records your results in your iHealth account. If you linked your iHealth account to your MyMSK (MSK patient portal) account, it will automatically send your results to your MSK healthcare provider. This will help them make decisions about your care while you're at home. For instructions for linking your iHealth account to your MyMSK account, read *How To Set Up Your iHealth® Pulse Oximeter* (www.mskcc.org/pe/set_up_ihealth_pulse_oximeter).

How to use your iHealth pulse oximeter

Follow your healthcare provider's instructions for how often to use your iHealth pulse oximeter.

1. **Open the iHealth MyVitals app.** Tap the app on your smartphone or tablet (see Figure 1). If needed, log in using the email and password you used when you made your account.

3. **Clip your pulse oximeter on your finger.** Pinch one end of your pulse

oximeter so the other end opens slightly. Hold your other hand so your palm faces toward you. Then, clip your pulse oximeter onto your index (pointer), middle, or ring finger with the display facing toward you (see Figure 3). Make sure your finger is clean and you aren't wearing nail polish or artificial (such as gel or acrylic) nails.

4. **Start measuring.** Press the button on your pulse oximeter to start measuring (see Figure 4). It will show your blood oxygen level (SpO2%) and pulse rate (PRbpm). Keep your hand still while it's measuring. Make sure your results are showing on the iHealth MyVitals app. If they are not, try moving your pulse oximeter to a different finger and pressing the button again.

5. **Review your results.** Once your results appear on the app, you can unclip the pulse oximeter from your finger. The iHealth MyVitals app will show you your results (see Figure 5). If you connected your iHealth account to your MyMSK account, your results will automatically be sent to your care team.
