How To Manage Stress While You're in the Hospital

Being in the hospital can be hard. Being away from your friends and family may make you feel lonely or scared. Here are some tips to help you manage stress while you're in the hospital.

Stay connected to friends and family

You can call, text, or video chat with friends and family even when you cannot be with them.

You may find it helpful to plan daily calls with them that you can look forward to. If you feel up to it, you can try video chatting while playing a game together.

Read *How To Use Technology To Connect With Family and Friends* (www.mskcc.org/pe/connect) for more information.

Try relaxation techniques

Relaxation techniques, such as deep breaths, stretching, and meditating, can help you manage stress. Visit www.msk.org/meditation to listen to our Integrative Medicine Service's free, guided meditations.

You can also find meditation, guided imagery, and other relaxing videos on the interactive TV screen in your room. Go to the "My Learning" section on the screen to search for videos.

Take a break from the news

Take breaks from watching or reading the news, including news on social media. You can watch movies and relaxation videos in the "Entertainment & Relaxation" category on the interactive TV in your room.

Do things that keep your mind busy

Activities such as reading, coloring, crossword puzzles, and word searches may help keep your mind busy. If you don't have anything like that with you, ask a member of your care team for some.

Schedule a visit with a therapy dog

Many people find that petting and spending time with dogs helps them feel relaxed. Therapy dogs are specially

trained and can visit you while you're in the hospital.

To schedule a visit with our therapy dogs, call MSK's Caring Canines program at 646-899-2248. Email the Volunteer Office at volunteerresources@mskcc.org or visit www.mskcc.org/caring-canines for more information.
