# MSK CATCH Nutrition Plan

This information for people in the MSK CATCH clinic can help you make healthy food choices to lower your cancer risk. It also includes a sample meal plan you can follow.

For more information about MSK CATCH, read the resource *MSK CATCH: Expert advice on hereditary cancer syndromes* ([www.mskcc.org/pe/msk\\_catch](http://www.mskcc.org/pe/msk_catch)).

## Benefits of Following a Healthy Diet

What you eat matters. Meals that include healthy foods can be delicious to eat and vital to your overall well-being. By making healthy food choices, you can lower your cancer risk by:

- Staying at or reaching a healthy weight for you
- Having less extra body fat
- Supporting a healthy microbiome (the good bacteria living in your digestive tract)
- Helping your immune system work better
- Helping your body carry out essential functions and repair itself

This resource can help you to eat right to lower your cancer risk.

- If you're new to healthy eating or need help to gradually make a change, read our advice on how to adopt healthy eating habits.
- Ready to make a change right away? Follow the detailed sample meal plan with recipe suggestions.

# Adopting Healthy Eating Habits

For many people, food is as much about the pleasure of eating—the flavors and smells—as it is about nutrition. When thinking about what you eat, it's important to find foods that do both. The more you enjoy your food, the more likely you are to keep eating healthy.

We understand it can be hard to change your eating habits. You don't have to change everything at once. You can make gradual shifts towards a healthier, more plant-based diet. Small changes can add up over time.

Think about these ideas for starting new healthy eating habits:

- Try a new recipe. Visit [www.mskcc.org/nutrition](http://www.mskcc.org/nutrition) for ideas.
- Practice mindful eating. Make a point to taste, smell, and use all your senses when you eat. Take your time with meals as best as you can.
- Find ways to manage stress that don't involve eating so food isn't your first go-to.
- When dining out, be mindful of portions. Most restaurants offer much larger portions than most of us need to eat during one meal.
- Know what's in the food you're eating. Learn how to read and understand food labels. Claims made on the front of the packaging are often misleading.
- You can have structure without being rigid in your meal planning. Try to stick with a routine most days, but don't let unexpected schedule changes derail you.
- Try to include at least one vegetable or fruit with every meal or most meals. Organize your kitchen to encourage better food choices. For example, try putting fresh fruits and vegetables or individual yogurts at the front of the top shelf in your fridge.
- If there are foods or drinks you know you don't want to eat, don't bring them into your house. We tend to eat what we see and what's easy to get.
- Remember that healthy eating happens over a lifetime, not in a week or a

day. Long-term sustainable eating patterns work better than quick fixes.

## **Food Choices to Lower Your Cancer Risk**

We recommend a mostly whole-food plant-based diet for lowering your cancer risk. Whole foods are foods that are close to their natural state and aren't very processed. For example, plain instant oatmeal and Corn Flakes® are both packaged foods, but oatmeal is more of a whole food.

A whole-food plant-based diet is made up of many different fruits, vegetables, cereals, legumes (such as beans, peas, and lentils), poultry, fish, nuts, seeds, and olive oil. This model of healthy eating supports better health and overall quality of life. It can also lower your risk of heart disease, stroke, diabetes, certain cancers, and death.

It's OK to include some animal products (such as poultry, fish, eggs, and yogurt) in your diet, but try to build your diet around mostly plant-based whole foods. Examples include:

- Vegetables such as carrots, asparagus, cauliflower, tomatoes, broccoli, spinach, brussels sprouts, garlic, kale, collards, and squash
- Fruits such as apples, strawberries, raspberries, blueberries, cherries, grapes, mangoes, and oranges
- Whole grains such as oatmeal, brown or wild rice, whole wheat, quinoa, barley, and buckwheat
- Beans and legumes such as peas, tofu, tempeh, chickpeas, red beans, and lentils
- Nuts and seeds such as pumpkin seeds, almonds, cashews, walnuts, and peanuts or peanut butter
- Other whole plant foods such as tea, coffee, and culinary spices and herbs

Limit red meat and highly processed foods, such as:

- Fast foods
- Processed meats (such as deli meats, hot dogs, sausage, salami, and bacon)
- Sugar-sweetened drinks
- Alcohol

## Sample Meal Plan

If you like more structure in the meals you eat each week, follow this sample meal plan. Remember that this meal plan is just an example. You can include other whole food, plant-based meals. You can also change any of these recipes based on your lifestyle, the foods you like, or the ingredients you already have.

Here’s the basic outline of what a week’s meal plan could look like. For the recipes for these meals, click the meal name or read the “Recipes” section below.

- Cook time: 25 minutes
- Total time: 70 minutes

Makes 6 servings.

### **Ingredients**

- ½ cup red quinoa
- 1 cup water
- 1 (15-ounce) can black beans (1¾ cup cooked)
- 1 (15.25-ounce) can corn, drained
- 1 medium red bell pepper, diced
- 1 cup cherry tomatoes, halved
- 2 cloves garlic, minced
- 6 tablespoons extra-virgin olive oil

- 4 tablespoons lime juice
- 1 teaspoon lime zest

5. To serve, bring the salad to room temperature. Add the avocado and mix gently to combine.

- Cook time: 45 minutes
- Total time: 65 minutes

Makes 6 servings.

## Ingredients

- 4 pounds spaghetti squash, halved lengthwise and seeded
- 2 tablespoons water
- 1 tablespoon extra-virgin olive oil
- 4 cloves garlic, minced
- 1 pound chicken breast, diced
- 2 cups broccoli florets, chopped
- ½ cup low-sodium chicken broth
- 1½ cups grated part-skim mozzarella cheese
- ½ cup grated Parmesan
- 1 teaspoon Italian seasoning
- 1 teaspoon salt
- ¼ teaspoon ground pepper
- ¼ cup panko breadcrumbs

## Instructions

1. Rinse the fresh produce well under warm running water for 20 seconds. Scrub it to remove any dirt.
2. Position racks in the upper and lower thirds of the oven. Preheat the oven to 375 °F.
3. Place the squash cut-side down on a microwave-safe dish. Add water and microwave it on high until the flesh is tender, about 12 to 14 minutes. When it's cool, scrape the flesh from the rind in spaghetti-like strands.
4. Heat the olive oil in a skillet over medium-high heat. Add the garlic and chicken and cook until the chicken is browned on all sides. Add the broccoli and broth and cook for 2 minutes.
5. In a large bowl, toss the shredded spaghetti squash and chicken mixture with  $\frac{3}{4}$  cup mozzarella, 2 tablespoons Parmesan, the Italian seasoning, salt, and pepper. Spread it in an oven-safe casserole dish. Sprinkle it with remaining  $\frac{3}{4}$  cup mozzarella and 6 tablespoons of Parmesan and top it with the breadcrumbs.
6. Bake on lower rack of oven for 15 minutes. Then, move it to the upper rack and increase the heat to 425 °F. Bake until the cheese browns, about 3 to 5 more minutes. The casserole should be 165 °F or higher using an instant-read thermometer stuck in the middle of the dish.

# Spiced chickpeas

The next time you're craving potato chips, reach for this snack instead. The key is to make sure the chickpeas are well-dried before you put them in the oven. They should look dull (not shiny) after you blot them with paper towels.

- Prep time: 10 minutes
- Cook time: 30 minutes
- Total time: 40 minutes

Makes 4 servings.

## Ingredients

- 1 teaspoon ground cumin
- 1 teaspoon smoked sweet paprika
- ½ teaspoon garlic powder
- ½ teaspoon onion powder
- ⅛ teaspoon salt
- ⅛ teaspoon black pepper
- Pinch of cayenne pepper
- 2 tablespoons extra-virgin olive oil
- 1 (15-ounce) can chickpeas, no salt added or low sodium, drained

## Instructions

1. Preheat the oven to 400 °F.
2. In a medium mixing bowl, use a small whisk to combine the cumin, paprika, garlic powder, onion powder, salt, black pepper, and cayenne. Add the oil and whisk to combine.
3. Put a double layer of paper towels on a counter or table. Rinse the chickpeas in a colander. Shake them well, then spread them evenly

across the paper towels. Blot the chickpeas using a clean paper towel. Repeat as needed until the chickpeas are completely dry.

4. Add the chickpeas to the spice mixture. Using your fingers, gently mix and massage them until they're evenly coated.
5. Line a baking sheet with parchment paper. Spread the chickpeas evenly across the pan.
6. Bake, rotating the sheet every 8 minutes, until the chickpeas are firm, about 24 to 32 minutes.
7. Remove the sheet from the oven and let the chickpeas cool. Serve them right away or move them to an airtight container. You can store them in an airtight container in the refrigerator for up to 3 days.

## **Stovetop eggplant barley paella**

You can adapt this recipe for any season with whatever seasonal produce you have. Instead of eggplant, try zucchini in the summer or mushrooms in the fall.

- Prep time: 15 minutes
- Cook time: 60 minutes
- Total time: 75 minutes

Makes 4 servings.

## Ingredients

- 2 cups pearl barley, washed
- 5 cups water
- 4 cups vegetable stock
- 1 sprig flat-leaf parsley, plus 3 tablespoons chopped
- Salt
- 2 tablespoons olive oil, plus more for drizzling
- 1 clove garlic, smashed and sliced
- 2 sprigs thyme, leaves stripped
- 2 shallots or 1 small onion, diced
- 1 poblano pepper, seeded, ribbed, and cut into thin strips
- 1 eggplant, cut into ¼-inch pieces
- ½ teaspoon ground cumin
- ½ teaspoon sweet smoked paprika
- 1 bay leaf
- ½ cup lemon juice
- 1 tablespoon chopped cilantro

## Instructions

1. Rinse the fresh produce well under warm running water for 20 seconds. Scrub it to remove any dirt.
2. Put the barley in a pot with the water, vegetable stock, parsley sprig, a good pinch of salt, and a drizzle of olive oil. Bring it to a boil, then lower the heat and let it simmer, covered, until the barley is slightly undercooked, about 25 to 30 minutes. (You'll cook it more later.)
3. While the barley is cooking, heat 2 tablespoons of olive oil over medium-high heat in a large frying pan. Add the garlic and thyme and cook until the garlic starts to brown.

4. Add the shallots and poblano pepper to the frying pan. Cook, stirring, until the pepper softens and the shallots start to caramelize.
5. Add the eggplant and 2 tablespoons of chopped parsley to the frying pan. Cook for a few minutes.
6. Add the cumin and paprika to the frying pan and cook for 1 minute. Then, add the bay leaf and a pinch of salt. Mix well and cook until the eggplant softens, about 7 to 10 minutes.
7. Add the lemon juice to the frying pan and cook until the consistency is syrupy. Cover it and lower the heat to low. Let it simmer for 10 minutes.
8. Remove the parsley sprig from the barley and the bay leaf from the frying pan. Add the semi-cooked barley (and any cooking liquid left in the pot) to the eggplant mixture. Bring it to a boil, then lower the heat and let it simmer, stirring occasionally, until the barley is al dente, about 10 to 15 minutes.
9. Stir in the cilantro and remaining 1 tablespoon chopped parsley, heat it through, and serve. The paella should be 145 °F or higher using an instant-read thermometer stuck in the middle of the dish.
