

My Recovery Roadmap

Latissimus Flap Breast Reconstruction

Track your progress by checking off items when you complete them.

Pre-Operative (Pre-op) Visit

Setting recovery goals

- I understand my instructions for taking medications and dietary supplements before my surgery.
- I understand my instructions for eating and drinking before my surgery.
- I understand I'll get a nerve block on the day of my surgery.
- I'm familiar with my recovery roadmap for my hospital stay.
- My main caregiver learned about my surgery and how to help me care for myself afterward.

Setting up MyMSK

- I have a MyMSK account.
- I know my MyMSK username and password.
- I have the MyMSK app on my smartphone or tablet.

Learning about my incisions, drains, and medications

- I know I'll need to care for my incisions at home after my surgery.
- I know I'll have some drains when I leave the hospital and will need to care for them at home.
- I know I'll need to take blood thinner medication at home after my surgery. Before I leave the hospital, my doctors will decide if it will be an oral medication (pill) **or** an injection (shot).

Planning for my discharge

- I know my planned discharge date.
- I have a ride home from the hospital.
- I have a caregiver to help me at home after my surgery.

At Home

Getting ready for my surgery

- I read *Getting Ready for Surgery*. You can find it at www.mskcc.org/ready_surgery or by pointing your smartphone's camera at the QR code to the right.
- I called my healthcare provider to ask them questions **or** I do not have any questions.

Learning about my drains and medications

- I watched *How to Care for Your Jackson-Pratt Drain* (www.mskcc.org/jp).
- I read *Rivaroxaban* (www.mskcc.org/rivaroxaban).
- I called my healthcare provider to ask them questions **or** I do not have any questions.

My Recovery Roadmap

Latissimus Flap Breast Reconstruction

Track your progress by checking off items when you complete them. You can keep track here or in your MyMSK Goals to Discharge checklist. For more information, read *Frequently Asked Questions About the MyMSK Goals to Discharge Checklist* (www.mskcc.org/goals_discharge).

Day of Surgery

Eating and drinking

- I started drinking liquids.
- I ate solid food.

Managing my pain

- I took oral pain medication.
- I talked with my nurse about my pain medications.

Moving around

- I used my incentive spirometer following my nurse's instructions.
- I moved to my chair with help.
- I walked around the unit with help.

Caring for my drains

- I learned how to care for my drains from my nurse.
- I told my nurse the name of my caregiver who will care for my drains at home.

Getting ready to leave

- I talked with my nurse about my discharge date.
- I have a ride home tomorrow morning.
- I reviewed the supplies I'll take home with my nurse.

Day of Discharge

Managing my pain

- I talked with my nurse about my pain medications.

Moving around

- I spent most of the day sitting in my chair.
- I walked more today than yesterday.
- I met with my physical therapist.

Caring for my incisions

- I learned how to care for my incisions from my nurse.
- My dressing was removed.

Caring for my drains

- I watched *How to Care for Your Jackson-Pratt Drain*.
- I showed my nurse that my caregiver and I can care for my drains.

Getting ready to leave

- I ate breakfast.
- I learned how to shower at home from my nurse.
- I reviewed my discharge instructions with my nurse.
- I reviewed the medications I'll take at home with my pharmacist or nurse.
- I understand that I must take my blood thinner medication every day.

Do not do these things until your surgeon says it's safe to do them:

- Do not do any activities that can put strain on your upper body (such as push-ups).
- Do not do any high-impact activities (such as running, jumping, or aerobics).
- Do not lift or carry anything heavier than 5 pounds (2.3 kilograms). This includes pets and children.
