

PATIENT & CAREGIVER EDUCATION

Spanish Speaking Program: MSK and Community Resources and Services

Balancing cancer treatment along with home, family, or work responsibilities can be challenging. Join the Integrated Cancer Care Access Network (ICCAN) to learn about resources available to cancer patients and their caregivers. We will discuss how ICCAN can support you throughout your care. During the talk, we will go over free services and resources that are available through MSK and in the community related to food, housing, immigration status, public benefits, financial assistance, and much more.

This program is open to MSK patients and their caregivers who speak Spanish and will be presented in Spanish.
