Tips for Healthy Eating on a Budget

This information can help you make healthy food choices while cutting down on food costs. It has tips for food planning, shopping, and cooking. It also has a list of healthy, low-cost pantry items, a sample meal plan, and recipes.

Healthy food choices help your body get more of the nutrients it needs to work its best. Making sure your body gets enough nutrients helps you feel better overall. It can also help you manage your symptoms and weight during cancer treatment.

For more information about making food choices during cancer treatment, read *Eating Well During Your Cancer Treatment* (www.mskcc.org/pe/eating-cancer-treatment).

Planning

Planning is the key to healthy eating on a budget. You can plan by looking for sales, making a shopping list, and avoiding wasting food.

Look for Sales

- Look for sales on things such as:
 - Fresh produce (fruits and vegetables).
 - Lean proteins, such as poultry and fish. Poultry is meat from birds, such as chicken and turkey.
 - Low-fat dairy items, such as yogurt and skim or 1% milk.
 - Whole grains, such as brown rice, barley, oatmeal, and whole wheat bread.
 - Canned tuna, salmon, and sardines.

- Dried or canned beans.
- Items you use often or that are on your shopping list.
- Make a weekly eating plan based on what's on sale. Plan meals around fresh produce, lean proteins, low-fat dairy items, and other sale items. For example, you could make a simple meal with a lean meat or fish, vegetables, and whole grains. It's also helpful to plan meals that use the same ingredients.
- Stock up on items when they're on sale, especially non-perishable items. Non-perishable items are ones that last a very long time before spoiling. Examples include nut butters, canned beans, canned fish, and pasta.

Tips for Finding Sales

- Check newspapers, store circulars (fliers and ads), and store websites for sales and coupons.
- Download and check apps for sales. Stores that have apps include:
 - Aldi
 - BJ's
 - ShopRite
 - Stop & Shop
 - Walmart
 - Wegmans

Online markets that have apps include:

- Fresh Direct
- Imperfect Foods
- Instacart
- Misfit Market
- Shipt
- Visit different grocery stores in your neighborhood and compare their

prices. There are also apps such as Flipp that can compare prices at deals in stores in your area. Items can cost more at one store than another.

- If you need a certain product, visit the company's website to check for coupons.
- Think about making a weekly habit of checking for sales. You can compare prices and stay aware of sales.

Make a Shopping List

- Make a shopping list based on your weekly eating plan. Stick to your list when you shop.
- Spend most of your food budget on nutrient-rich vegetables, fruits, low-fat dairy, lean protein, and whole grains. For more examples, read the section "Low-Cost Items to Build a Healthy Pantry."
- Try to buy produce that's in season. It's flavorful and there's lots of it. It also usually costs less than produce not in season. Visit www.seasonalfoodguide.org to learn what produce is in season in your area.
- If you need to buy produce that is not in season, buy it frozen.
- Avoid items with added sugar or salt. Check the item's ingredient list to see if sugar or salt was added.

Don't Waste Food

- Use highly perishable items early in the week. Highly perishable items are ones that spoil quickly, such as fish and seafood, salad greens, berries, and fresh herbs. Save less perishable items for later in the week. Less perishable items are ones that don't spoil as quickly.
- Have leftovers for lunch.
- Create new meals from leftover ingredients. For example, you can use leftover cooked meat and vegetables as a filling for a casserole, frittata, wrap, or soup.
- Freeze foods or leftovers to use later.

Shopping

Here are some tips for smart, low-cost grocery shopping.

- Do not go food shopping when you're hungry.
- Only buy items on your grocery list. Sticking to your list will help you avoid spending money on things you didn't plan on.
- Choose store brands instead of name brands. They often cost less, and their quality and taste are just as good.
- Avoid pre-prepared items, such as washed or cut vegetables and shredded cheese. Pre-prepared items cost more. It's better to prepare the items yourself if you have time.
- Avoid pre-packaged meals. They often cost more than cooking yourself.
- Buy bulk goods online or from warehouse clubs (such as Sam's Club, Costco, and BJ's). Remember only to buy things you know you'll use before they spoil or expire.
 - Buying in bulk can seem expensive, but it can help you spend less over time. Spending a larger amount all at once means you won't need to keep spending smaller amounts that add up.
- Know how much you're spending. Use a calculator (such as the one on your phone) to keep track of how much you're spending while you shop.
 - In New York, most food items are not taxed. Foods that are taxed include:
 - Heated foods.
 - Ready-made foods, including sandwiches.
 - Carbonated (fizzy) drinks.
 - Candies and sweets.

If you're buying these items, make sure to account for tax.

- Compare the unit price of items. The unit price is the price for a set volume or weight. It's usually listed on the tag below the item on the shelf. Checking

the unit price helps you better compare costs, especially for items that are different sizes.

- Check the clearance shelves for discounted items.
- Skip aisles or sections with soda, chips, cookies, and candy, if you can.
- Avoid buying sugary drinks such as sodas or juices. Drink water at home instead.

If you go to the same store often, sign up for their loyalty or rewards program. You'll get member-only discounts automatically at checkout. Some programs even offer extra benefits, such as cash rewards for frequent shoppers.

Cooking

- Use the same ingredients and leftovers for different recipes. For example:
 - Make a double batch of brown rice. Use it the next day too.
 - Chop broccoli for a potato dish. Use the leftovers for a broccoli stir fry.

Low-Cost Items to Build a Healthy Pantry

The items in the section are low-cost and healthy. Think about making them part of your weekly eating plan, especially when you see them on sale.

Choose dried legumes rather than canned legumes, especially if you have a pressure cooker or slow cooker such as a Crockpot® or Instant Pot®. A bag of dried beans is less expensive and has more servings than a can of beans. Using a pressure cooker or slow cooker lets you cook dried legumes more quickly.

Lunch Recipes

Loaded Potato with Broccoli and Cheese

Prep Time	Cook Time	Servings	Total Cost
10 minutes	30 minutes	2	\$3.03

Ingredients

- 2 russet potatoes
- 2 tablespoons olive oil
- Salt and pepper
- 2 cups broccoli florets
- 2 garlic cloves, minced (chopped into small pieces)
- ¼ cup shredded cheddar cheese
- 2 green onions (scallions), chopped

Instructions

1. Preheat the oven to 400 °F (204° C).
2. Wash and dry the potatoes. Place them on a microwave-safe plate. Prick each one with a fork in 2 to 3 places. Microwave them for 4 minutes.
3. Carefully move the potatoes from the microwave-safe plate to a baking sheet. Bake them for 10 to 15 minutes.
4. While the potatoes are baking, heat a skillet over medium-high heat. Add the broccoli florets, minced garlic, and 2 to 3 tablespoons of water. Mix them together. Cook for 2 to 3 minutes, until the water disappears. Steam will cook the broccoli as the water evaporates.

5. Take the potatoes out of the oven. Cut each one lengthwise in the center and use a fork or spoon to open them. Create a small hole in the potatoes by removing a bit of the potato flesh and setting aside for later.
6. Add 1 tablespoon of olive oil to each potato. You can also add a pinch of salt and pepper, if you want. Mash and lightly mix. Mix the extra potato flesh with the broccoli and place the mixture on top of each potato. Add the shredded cheese. Put them back in the oven until the cheese melts (about 2 minutes).
7. Sprinkle the green onion on top of each potato.
