Care Closer to Home: Hospital Care on Long Island for Memorial Sloan Kettering Patients

Memorial Sloan Kettering (MSK) and New York Cancer & Blood Specialists (NYCBS) are partnering to make it easier for you to get the inpatient care you need on Long Island, close to home.

You can now get inpatient care at hospitals on Long Island as an MSK patient if:

- You have urgent symptoms
- You need to be admitted to a hospital

When your MSK healthcare provider tells you to go to a Long Island hospital, they'll let the team at NYCBS know that you're an MSK patient. During your hospital stay on Long Island, you'll be under the care of an oncologist (cancer doctor) from the cancer specialists at NYCBS.

Your care teams at MSK and NYCBS will share important health information and talk daily to coordinate your care during your hospital stay on Long Island.

After your hospital stay, you'll once again be in the care of your MSK

healthcare provider.

The care you need that's conveniently close to home through our partnership with New York Cancer & Blood Specialists. Available at:

Suffolk County

- Stony Brook University Hospital
- Good Samaritan Hospital Medical Center
- Huntington Hospital
- Long Island Community Hospital (formerly Brookhaven Hospital)
