Young Adult Workshop: Returning to Work

Join the MSK Adolescent and Young Adult Program and [Cancer & Careers](#) for a virtual workshop on navigating the return to work after a cancer diagnosis.

This session covers practical concerns that arise when dealing with cancer in the workplace. Whether you are looking for a new job after treatment or returning to the same job you had before treatment, this session will provide information to help you take your next steps.

This workshop is open to MSK patients ages 21 to 39.
